 peteChain
 click here to go twitter
 click here to visit my github

From the ctf made by **cyrange** and **blackninja23**

 I would like to share how I solved these challenges as fast as I done

1.
................refers to a defender who identifies and patches vulnerabilities into successful breaches.

   Since the question required to measure our googling capacity then it was the issue of talking with google..
   I pasted as it is google but found no results

Even if visted the link I din't get any answer.

 Answer:
I applied advanced google dorking to solve this, you may check the room in tryhackme platform click here
   So I used Quotation marks to signify Google that am looking for an exact match
       "**refers to a defender who identifies and patches vulnerabilities into successful breaches**"
